 Multilayer

 Variable Data

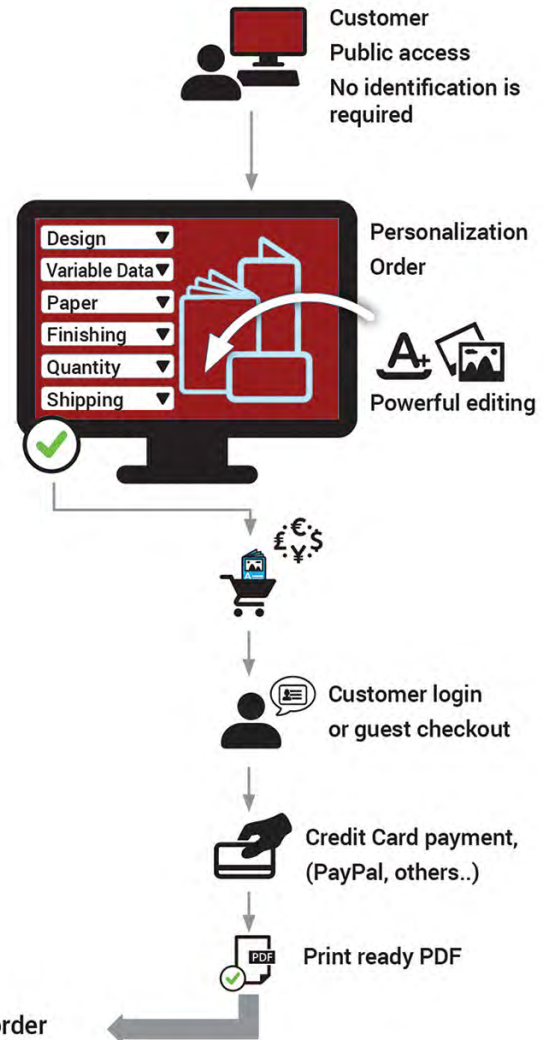

CONNECT B2B

Dedicated "big business" accounts

CONNECT B2C

Public stores for niche or general markets

On receipt of order
PRINTING

New order received!
You (or your print vendor) are notified of the new order. The generated PDF is ready to print.

- Notifications and reports
- Job status
- Order history
- External suppliers
- Stock control and inventory

- Imposition
- Preflight and color management
- Workflow API / XML (Web Services)
- MIS / ERP
- Scheduling

Connect Administration
One person can quickly and reliably manage orders.

Connect grows with you
Integration options enable you to increase your productivity and make your work easier as needs grow.

Printing and delivery
The job is printed and delivered through the shipping method selected by the customer.

Why Connect?

Award-winning leader in the development of Web-to-Print software.

No major hardware investment or programming skills needed.

SEO tools to help maximize the positioning and ranking of your stores in search engines.

Open architecture enables connection with 3rd party applications using Web services (API), cXML, JDF, etc

Numerous partner integrations with MIS / ERP systems.

A SaaS (Software as a Service) model known for quality, reliability and value

Bi-weekly updates deliver improvements, new technology and new capabilities to our customers.

B2C and B2B storefront flexibility opens new selling opportunities for you.

How Does It Work?

Tailor the buying experience for your customer including user interface, branding, pricing, shipping and payment options. Approval workflows, multi-level permissions, and more.

Plans That Fit

Connect has plans configured to suit your business today and positioned to grow with you.

Markets

Great for in-plant, commercial, digital, offset, flexo, and wide format printing markets, as well as brokers, agencies, designers, and franchises.

Always up to date.
